

Supplies

Instructions

Step #1 Push two pins (for eyes) into the head ball. Add nose.

Step #2 Position one full size toothpick on the bottom of the head ball in the center and push into the head (this makes a hole to help with the assembly).

Step #3

1. Take toothpick out of the head and position the same toothpick in the center of the body ball. Press down the toothpick, leaving about an inch sticking out.

2. Press head onto the toothpick. Now you should have a snowman body with a face.

Step #4

1. Position another full size toothpick in the center of the ice platform and press to the bottom.

2. Take the toothpick out of the platform, position the same toothpick in the bottom center of the body ball (1.8 inch) and press into the body only leaving as much as the thickness of the platform. Add snowman to the platform.

Step #5

Wrap the scarf around the snowman's neck (between the head and body), over lap in the center, press a straight pin into the felt and ball.

Step #6

Press two buttons (cut off straight pins) down the center under the scarf. For arms, insert cut wire pieces on each side of the body ball.
